

Nikoloz Gagua

Senior-Level Software Developer

+995 577 055464 ngagua@gmail.com Tbilisi, Georgia

Summary

Full-stack software developer with strong expertise in modern Angular (signals, standalone components, NgRx, RxJS, Material UI, TypeScript) and Java / Spring Boot (Spring Data JPA, Hibernate, REST APIs, OpenAPI/Swagger). Currently building healthcare and wellness platforms used by millions of members worldwide, including the NextGen CARES cardiac arrest registry for Emory University and the Vitality global wellness program. Additional hands-on experience as a Drupal 8/9/10 developer (custom modules, theming with Twig and PHP, third-party API integrations).

Experience

Senior-Level Software Developer Oct 2025 - Present
Re-Software, Inc. Remote · Tbilisi, Georgia

Independent contractor embedded with the Ventricle Pod in the CARES Program at Emory University's Woodruff Health Sciences Center (Atlanta, GA). Build and maintain the Angular front-end and Java back-end of NextGen CARES under a Master Service Agreement between Emory and Re-Software, Inc.

- Contribute across the full development lifecycle — specifications, design, implementation, testing, and release.
- Build scalable Angular features (standalone components, signals-first architecture, NgRx state) and supporting Java / Spring Boot services and REST APIs.
- Review specifications, models, and code analytically to ensure the solution meets clinical and operational requirements.

Project - NextGen CARES: CDC- and Emory-developed out-of-hospital cardiac arrest registry covering 34 state-based registries with a catchment area of 170M+ people and 1M+ patients enrolled. mycares.net/nextGen

Software Developer (Angular + Java / Spring Boot) Sep 2022 - Present
Vitality Group Inc. Remote · Tbilisi, Georgia

Contracted through Omedia to build and maintain Vitality's global wellness platform, used by 27M+ members across 38 markets.

- Develop enterprise-scale Angular features using a signals-first, standalone-component architecture with NgRx state management, RxJS reactive streams, and OnPush change detection for optimal rendering performance.
- Design and optimize RESTful APIs in Java / Spring Boot (Spring Data JPA, Hibernate, MySQL) with auto-generated contracts via SpringDoc / OpenAPI (Swagger).
- Apply smart / dumb component patterns and reusable feature factories to keep the front-end codebase scalable, testable, and aligned with modern Angular practices.
- Enforce code quality through unit and integration testing, peer code reviews, and CI checks;
- Partner with UI/UX designers to deliver responsive, accessible interfaces with Angular Material and modern CSS.

Project - Vitality: Interactive, personalized wellness platform engaging 27M+ members across 38 markets through partnerships with leading global insurers and employers. powerofvitality.com

Accomplishments

Developed healthcare and wellness platforms used by millions, including NextGen CARES cardiac arrest registry and Vitality global wellness program.

Drupal Developer

Oct 2024 - Present

Omedia

Tbilisi, Georgia

Develop and maintain Drupal-based websites and web applications. Create and customize Drupal themes, templates, and modules based on project requirements. Ensure websites are responsive, accessible, and performance-optimized. Integrate third-party services and APIs with Drupal. Manage Drupal site configurations, content types, taxonomies, and permissions. Debug and troubleshoot issues with Drupal modules, themes, and configurations.

Angular Developer

Jun 2022 - Present

Omedia

Tbilisi, Georgia

Deliver enterprise-grade Angular front-end work for Omedia’s clients, including the long-running engagement with Vitality Group. Apply modern Angular patterns: standalone components, signals, OnPush change detection, NgRx state management, and reactive RxJS streams.

Deputy Head of Division

Mar 2010 - Jun 2022

Georgia Revenue Service

Tbilisi, Georgia

Held progressively senior positions over 12 years, including 8 years as Deputy Head of Division. Oversaw a team of up to 60 members and led multi-stakeholder initiatives across public and private partnerships. Drove strategic planning, project delivery, and team development in a complex regulatory environment.
